

Reading List for 2026

Last Updated On: Feb 27th 2026

Contents

1	Computer Science	2
1.1	Fiction	4
1.2	Nonfiction	4
1.3	Research Literature	4
1.4	Textbooks	4
2	Leisure	4
2.1	Fiction	4
2.2	Nonfiction	4
2.3	Research Literature	4
2.4	Textbooks	4
3	Mathematics	4
3.1	Fiction	4
3.2	Nonfiction	4
3.3	Research Literature	4
3.4	Textbooks	4
4	Physics	4
4.1	Fiction	4
4.2	Nonfiction	4
4.3	Research Literature	4
4.4	Textbooks	4
5	Books Completed w/ Time Of Completion	4
5.1	Computer Science	4
5.2	Leisure	4
5.3	Mathematics	4
5.4	Physics	4

1 Computer Science

This section encompasses my reading in Computer Science, spanning both technical and narrative works. Topics include, but are not limited to:

1. Collected Works
2. Fiction and biographical accounts of notable and up and coming computer scientists
3. Conceptual textbooks ranging from foundational to advanced topics, such as:
 - (a) **Data Structures & Algorithms**
 - i. **Data Structures** can be defined as the medium through which data and is stored to be accessed later on. Simply put, a data structure is a collection of data values, the relationships that take place among them, and the functions or operations that can be applied to the data
 - (b) **Computer Organization and Design**
 - (c) **Operating Systems**
 - (d) **Discrete Structures**
 - (e) **Machine Learning & Neural Networks**
 - (f) **Reinforcement Learning**
 - (g) **Natural Language processing (NLP)**
 - (h) **Computer Vision**
 - (i) **Information Theory**
